

MULTI-FUNCTIONAL, ERGONOMIC
& SIMPLE TO INSTALL SOLUTIONS
TO LIVE, WORK AND MEET

INTEGRATED
SOLUTIONS FOR
FURNITURE

INCARATM

INCARA™

Incara is a range of functional, ergonomic wiring devices dedicated to any modern, flexible workspace, from office to hotel, café, airport or any other shared working environment.

WITH INCARA, USERS CAN GET TO WORK IMMEDIATELY. THEY HAVE BOTH POWER AND DATA AVAILABLE WITHIN EASY REACH FOR CONNECTING THEIR EQUIPMENT.

The range is designed with the professional installer and the end user in mind, for simple installation, setup and operation. Incara can be integrated into all types of furniture seamlessly, so end users can get on with their daily lives.

Legrand, the leading manufacturer of wiring accessories, brings all its know-how, quality assurance and a wide range of functions and finishes which allow many elements of Incara to be customised upon request.

In timeless shades or vibrant colours, Incara's attractive, modern finishes lend a touch of class to any space.

Multi-functional,
easy to install and
designed for simplicity
of operation.

INCARA™

A mark of success

ABOUT US

Legrand is the global specialist in electrical and digital building infrastructures. Our purpose is to improve lives by transforming the spaces where people live, work and meet with electrical and digital infrastructures and connected solutions that are simple, innovative and sustainable. When you choose Legrand, you put our powerful worldwide presence and guaranteed global expertise to work for you. You are sure to find the solutions you need among our innovative applications in new business segments.

With Legrand, you have the advantage of single logistics and distribution channels ensuring optimum lead times and mass production capability.

SOLUTIONS FOR ANY KIND OF PROJECT

The way we work is constantly changing, as are the technical requirements that modern office buildings have to fulfil: areas for people to work independently are just as important as shared offices, meeting rooms and relaxation areas. Easy and flexible access to power or data sockets whenever and wherever they are needed is a must to ensure seamless transitions between all these different ways of working. Legrand's Incara range of integrated solutions for furniture makes this possible. These flexible, stylish products are easy to install and can be integrated seamlessly into any kind of space.

LEGRAND DESIGN, A MARK OF SUCCESS

Our products are used daily by people all over the world. These everyday objects add a touch of quality to daily life through functionality and a seamless user experience. Design is not only about aesthetics, it is about providing solutions - that is why users and real life situations are at the heart of our process. We are always striving to meet new needs and transform our findings into smart, effective solutions that combine practicality with comfort.

SUSTAINABILITY AND QUALITY

The economic and environmental challenges we face demand an increasingly sustainable approach to designing, building and retrofitting buildings. All our products are carefully designed right down to the smallest detail to ensure their robustness and durability contributes to a sustainable world. Our designers are always mindful of the circularity of our products when designing new solutions, considering the full life cycle from manufacturing methods and materials to use and recycling. But quality is our overriding priority. The best way to help the environment is to choose a product that will last.

COLOURS, MATERIALS AND FINISHES

We take our inspiration from a wide variety of sources, including the worlds of electronics, fashion and transport, to design functional products with lasting appeal that are adapted to the environment in which they are used. Made from materials selected for their appearance and performance (impact resistant plastics, high quality aluminium), the Incara range offers three different categories of finish.

LEGRAND GROUP: FOUR MAIN AREAS OF ACTION TO IMPROVE LIVES

Legrand's corporate social responsibility (CSR) is based on four focal areas which guide and structure its commitments. Published in March 2022, the 2022-2024 CSR roadmap details the 15 priorities the Group has set itself to meet its CSR commitments and challenges, and defines the objectives to be achieved :

LEGRAND HAS BEEN AWARDED THE ECOVADIS PLATINUM MEDAL, THE HIGHEST DISTINCTION AWARDED TO THE TOP 1% OF THE BEST PERFORMING COMPANIES IN TERMS OF CSR AMONG ALL COMPANIES ASSESSED BY ECOVADIS.

PROMOTE DIVERSITY AND INCLUSION

- Gender diversity
- 'Diversity & Inclusion' labelling
- Employability of Early-in-careers
- Diversity and inclusion among suppliers

REDUCE OUR CARBON FOOTPRINT

- CO₂ emissions avoided for our customers
- Direct and indirect CO₂ emissions (scopes 1 & 2)
- Indirect CO₂ emissions (scope 3)

DEVELOP A CIRCULAR ECONOMY

- Use of recycled materials
- Phase out single-use plastic
- Environmental declarations

BE A RESPONSIBLE BUSINESS

- Customer satisfaction
- Business ethics/compliance
- Employability and skills development
- Safe workplace
- Expanded social coverage

ECO-DESIGN

Legrand's eco-design approach aims to reduce the environmental impact of its products from design to end of life, mainly through the choice of raw materials and optimised logistics.

The Incara range has been designed with cardboard packaging wherever possible to meet these environmental goals.

PRODUCT ENVIRONMENTAL PROFILE

At Legrand, we believe that it is our responsibility to inform users about the environmental impact of the Group's products. Reducing the impact of buildings on the environment starts with design choices. Informing users about the environmental impact of the products they use is therefore a top priority. The product environmental profile (PEP) is a reference tool to measure the environmental impact of electrical products.

PEPs are already available for some products, visit www.legrand.co.uk

A SUSTAINABLE OFFER

Incara solutions with integrated Arteor functions are scalable over time. These totally modular functions can be replaced to meet new user needs as technology evolves - USB Type-C (fast charging), power rating, etc. - and repositioned in your furniture to give them a second life.

2 USB Type-C ports

USB Type-C port with 30W power delivery

2 USB Type-A ports

INCARA™

Disq 60

Recharge anywhere,
at any time

Disq 60

ncara Disq 60 adapts to any environment offering a power socket or a USB charger. An attractive, discreet solution that is quick to install.

MULTIPLE APPLICATIONS

Based on a standard 60 mm cut-out, it can be fixed both horizontally and vertically in a surface (patented Legrand system), even thin ones (1 mm min).

Supplied with cord equipped with a 2P+E plug or a Wieland connector.

WIDE SELECTION OF FINISHES

Understated, discreet products and finishes that blend in seamlessly with any working environment.

The flush socket (patented Legrand system) is both attractive and easy to clean.

INCARA™

Pop-up

Attractive appearance
and easy to use

Pop-up

Pop-ups provide real ease of use and quick connection for mobile devices: laptops, smartphones, tablets, audio and video systems, etc. Users have a choice of both power and data connections within easy reach.

KNOW MORE

Pop-ups can take a wide range of functions available in the Arteor range, thus complying with specific requirements, such as fast charging of portable devices. Arteor 30 W USB Type-C power delivery chargers are specifically designed to charge all devices even faster! They can optimise charging by automatically selecting the most suitable voltage for the device battery.

Find out more visit: legrand.co.uk

SLEEK DESIGN

Extra-slim format to blend discreetly into the furniture. Its low profile takes up little space, even allowing installation above a drawer.

ELEGANT FINISHES

A set of finishes in harmony with both the furniture and the décor.

TIMELESS FINISHES

FUNCTIONALITY AND FLEXIBILITY

Available in 4, 2 x 4 and 8-module versions to be equipped or pre-equipped with power or data Arteor functions. 4-module pop-ups are also available in a version with integral wireless power charger.

SAFETY AND EASE OF USE

Wide button and cover with damper for smooth opening (patented Legrand system). IP44 version (with closed cover) for good protection in the event of accidental contact with liquids, on pop-ups with 4 and 8 modules.

INCARA™

Flip-up

The premium solution
for meeting rooms

Flip-up

Incara Flip-up is the premium solution for meeting rooms with its elegant and crisp appearance.

Sockets fit discreetly under its cover, even with your devices plugged in.

EXCELLENT STRENGTH AND EASE OF USE

With its simple push-to-open mechanism, the cover slides inside the product and the socket unit rises up (patented Legrand system). Access to the sockets is on both sides, making it an ideal solution for meeting rooms.

100% METAL FINISH

Metal cover, frame and cable gland plate for a sleek design which blends in harmoniously and creates a unique result. Other finishes and equipment are available in a preconfigured version.

COLOURS

Available on request (selection possible in the pCon software). See page 7.
